

CAMPUS SAFETY

Databuoy Creates Safer Campuses

Real-time gunshot detection

School shootings have taught us response times equal lives. SHOTPOINT, a real-time gunshot detection and localization system, provides responders with immediate notification and actionable information expediting response times.

SHOTPOINT Flexibility

SHOTPOINT is used indoors and outdoors with sensors placed up to 165 ft. apart and as high up as 65 ft. in real-world deployments, enabling coverage of large areas like gyms or stadiums. It integrates with a customer's security camera and access control systems. Reports can be delivered to mobile devices and third-party systems.

What users are saying about SHOTPOINT

"We test monthly and SHOTPOINT works consistently with multiple shooters. It shows us the most current shot and exact location of the shooters. In more than two years, we've had no false positives... This is a fantastic tool that enables us to respond quickly, effectively and accurately. I highly recommend SHOTPOINT."

- Chief Bryan Pegues, Aventura Police Dept., working with Aventura schools

THE DETAILS

- ✓ Reports in ~ 1 sec
- ✓ Indoors & Outdoors
- ✓ Shooter location ~ 1m
- ✓ Locates rifle trajectories
- ✓ Integrates with any VMS
- ✓ Other noise alerts
- ✓ Integrated Panic Button
- ✓ Mobile Alerts
- ✓ No False Detections
