GEOFOB® Mobile Panic Button

Panic Button Notifications in Real-time

With the GEOFOB, commercial and hotel security teams can instantly know if an employee, contractor, student, guest, or visitor needs urgent assistance, along with their identity and exact location.

Trusted Localization

The GEOFOB mobile panic button uses our patented wireless localization method and integrates with our existing network of smart sensors.

One-press Integration with KWIC

With the push of a button, GEOFOB provides all of the benefits of the our Know When It Counts (KWIC) application including video integration, plus all other integrated intel.

Deployment-ready Technology

The system meets the highest acceptance standards and requirements for hospitality, educational institutions and other commercial panic button applications.
