

SHOTPOINT INDOOR SENSORS

Indoor Package Options

SHOTPOINT's indoor sensor includes the basic sensor board in a rugged plastic enclosure with an additional PoE module. The enclosure includes a mounting ring that attaches to a 1-gang electrical box or low voltage frame for easy mounting to walls and/or ceilings.

Two (2) sensors with 165ft maximum spacing provide total area coverage and peace of mind in any indoor space.

SHOTPOINT indoor sensor features:

- ▶ Four (4) channel acoustics
- ▶ Gunfire signature detection
- ▶ Exports time-stamped shot detection data to support Shotpoint shooter localization
- ▶ Exports ambient sound metadata to support other acoustic classification
- ▶ Ethernet comms and PoE power

Dimensions	5.3" x 5.3" x 1"
Weight	7.3 oz
Power	1W, PoE (802.3at/af) input
Comms	Ethernet 802.3
Environment	-40 to +85, dust/static, humidity corrosion resistant
